

NCB MERCHANT PCI COMPLIANCE PROGRAMME

Dear Valued Merchant,

Your Participation is Mandatory

To protect the data security of your business and your customers, the Payments Association brands namely American Express, Discover® Financial Services, JCB International, Mastercard® and Visa, adopted the Payment Card Industry Data Security Standards (PCI DSS). These standards require all merchants accepting credit and debit cards to provide annual proof of compliance with industry regulations.

Participation in a certified PCI DSS compliance program is required of every merchant, regardless of your bank. Non-compliance can result in costly fees and the boosted threats of a security breach.

Against this background, National Commercial Bank Jamaica Limited (NCB) has partnered with Viking Cloud (formerly Sysnet Global Solutions), a Managed Security Service Provider (MSSP), to assist NCB with the implementation, maintenance and continued surveillance of its compliance programme. This partnership ensures that it is easy for you, our merchants, to comply with all PCI mandates so that you can meet industry regulations, protect your cardholder data and protect your financial resources, all with one simple programme.

The NCB Merchant PCI Compliance Programme:

1. Gives you access to a simple online questionnaire (provided by Viking Cloud) that will help ensure that you are compliant;
2. Provides proof of your compliance in the form of a Certificate and report to the Card Association when you have successfully completed the questionnaire;
3. Facilitates free quarterly or annual network vulnerability scan, should you be required by the Card Association to conduct them.
